

THE ÖREKIL-RIVER SALMON FISHING 2006

MUNKEDAL

The lower Örekil-river's fishing district contains all of the river, from the outlet of the lake "Kärnsjön" by "Torpdammen" to the north, to and including the river's mouth in "Saltkällefjorden" by Munkedal's harbour to the south.

The opening day of the fishing-season is May 15th and the season ends on September 30th. The regions are the same as last year, and with the same special areas for fly-fishing. Information maps of the fishing regions, fly-fishing areas, pools etc. can be found on the overleaf.

The General Public have the possibility to purchase fishing licences to three different regions of the river, A, B and C. Pre-bookings of fishing licences can be done at "Sportfiskekontoret" (Sport Fishing Office) by telephone or fax +46-524-10777 and the

best time to call is between 7.00 and 9.00 am, Monday to Friday.

Licences can also be purchased on site at the Sport Fishing Office (see map), at "Brålands gård" or at Hydro petrol station at the southern approach to Munkedal.

All the fishing regions are well marked with posts. The boundaries for the fly-fishing areas are marked with orange posts (region A and B). In the fly-fishing areas fishing is only allowed with fly-rod with fly-fishing line. Fishing is allowed on the whole river in all of the three regions, but to avoid "tangling with others" there are parts of the river where fishing is allowed from only one shore of the river. Fishing from boats, boat jetties or from private land is not allowed. Fishing licences are valid for one day, from 00.00 to 24.00 on the day listed on the licence. All the fishing rules and regulations, and good fishing ethics, are to be followed.

Region A:

This region is the highest up the river and is restricted at its upper part to the **west** side of the river. Fishing is allowed from approx. 40 meters south of the salmon steps at "Brålandsfallet", and downstream to the south part of the island at "Skäret". Then on the **east** side of the river from the island at "Skäret" to the junction with the Munkedal river, where this region ends. Please note that higher regions of the "Brålandsfallet" are not part of the fishing regions and as such fishing is prohibited. The region does not incorporate any part of the Munkedal river.

Region B:

On the **east** side of the river from the junction with the Munkedal river, and on the **west** side

from "Gatesand", then downstream on **both** sides to the south end of this region at the railway bridge at "Åtorp". In pool # 19 fishing is allowed from both sides of the river. Please note that fishing is not allowed on the west side of the river: at the old fire station, at the old police station and at Smith's Garage. Also note that the lower part of the region is shared with region C.

Region C:

On **both** sides of the river from the point of land at "Åtorp", downstream to the mouth of the river at "Saltkällefjorden". Please note that the upper part of the region is shared with region B.

Number of licences
to each region:

Odd numbered days: 20 per day
Even numbered days: 3 per day

Even numbered days: 20 per day
Odd numbered days: 3 per day

All days: 15 per day
